Art Unit: 1623

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wu et al (U.S. Patent No. 6,262,030) in view of Djokic et al (U.S. Patent No. 4,886,792).

Wu et al disclose closely analogous azithromycin antibiotics (see, for example, column 8) but do not disclose antibiotics having a hydroxy group at the 3-position. However, since Djokic et al disclose closely analogous antibiotics having hydroxy group at the 3-position and a process for preparing said compounds by removing a cladinose moiety (column 2), a person having ordinary skill in the art at the time the claimed invention was made would have been motivated to modify the compounds disclosed by Wu et al at the 3-position in accordance with the teaching by Djokic et al because such a person would have expected the resulting compounds to have antibiotic activity.

ELLI PESELEV
PRIMARY EXAMINER
GROUP 1200

Applicant's arguments filed July 16, 2007 have been fully considered but they are not persuasive.

Applicant contends that the compounds disclosed by Wu et al do not contain hydroxyl at the 2-position. This argument has not been found persuasive since Wu et al disclose azithromycins in column 1, all of which have hydroxy group at the 11-position i.e. hydroxy group at the 11-position of azithromycins is a standard group. Even though Wu et al disclose modification at the 11-position of a hydroxy group, it does not detract from the fact, that before said modification, the compounds by Wu et al contained hydroxy group at the 11-position (columns 55-56).

Applicant also contends that Djokic et al disclose that azithromycin derivative DESAZ, obtained by removal of cladinose residue only resulted in a compound with weaker activity in comparison with AZER, obtained by removal of both cladinose and desosamine residues. However, this does not detract from the fact that azithromycin compound wherein only cladinose sugar is removed and which contain a hydroxy group at the 3-position was known in the art at the time the claimed invention was made.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1623

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
